REPLACEMENT DRAWING

Check if any piece of the large frame is still missing when the end-of-frame command is received. If any is still missing, request retransmission of the sub-frame at position, specifying length.

Both Sender and Receiver know the ratio of sub-frames received with errors and received without errors. They also know the average sub-frame length for each sub-channel. Then they can update the optimum sub-frame size for each sub-channel

REPLACEMENT DRAWING

Sub-Frame Structure

Field	Proposed Number of Bits
Data/Command Indicator	1
Large Frame sequence number (Window of 2)	1
Character offset of sub-frame into large frame	11
Sub-Channel sequence number (Window of 7)	3
Data	0 to 2048
CRC	12
Shared Flag (Hex 7E)	8

This sub-frame structure is suitable for sub-channel utilization (Multi-link) use on media with high Bit Error Rates (BER)

FIG. 8

REPLACEMENT DRAWING

FIG. 9

One bit error every n bits on "raw" sub-channels		# of Sub-Channels with same characteristics	Effective sub-channel transfer rate	Cumulative Sub-Channel transfer rates
50	High	2	2000	4000
500	Med	5	6000	30000
5000	Low	13	8000	104000
TOTAL		20		138000

REPLACEMENT DRAWING

MAIN:

DO Always

Process Port Request

Process Bandwidth Release

Process Bandwidth Requests

Locate and tear down unused sub-channels

ENDDO

1710

PORT REQUEST:

Make reservation in least utilized sub-band

Reservation decision based on % of available Sub-Channels to assign (Based on parallel user BW vs. throughput efficiency)

IF reservation was made

Send frequency and code assignment

Update allocations

ELSE

Add port request to port queue

Calculate expected wait time

Send wait message to user

ENDIF

1720

BANDWIDTH RELEASE:

Notify channel-bonding function

Return frequency and code to available pool

Update radio record

1730

BANDWIDTH REQUEST:

Select highest priority with lowest bandwidth utilization, including need-allocation gap

Check other sub-bands for greatest available sub channels (Switch sub-bands if difference in sub-band space exceeds payback threshold)

Assign sub channels based on need, priority, availability

Notify channel bonding function

Update radio record

1740
